RE: Semi-annual Medical Waste Transporter Report

Dear Mr. Troy:

EPA has received WMI Medical Services, Inc.'s (Hudson, New Hampshire) Medical Waste Semi-annual Transporter Report for the reporting period of December 20, 1989 to June 17, 1990. In reviewing the enclosed transporter report, we have discovered that WMI Medical Services, Inc. of Hudson, New Hampshire has not submitted a Medical Waste Transporter Notification for the Covered States from which you transport medical waste. If WMI Medical Services, Inc. of Hudson, New Hampshire transports medical waste that was generated in one of the Covered States (Connecticut, New Jersey, New York, Rhode Island and Puerto Rico), you must submit a notification form to EPA. Upon receipt of the notification form, EPA will assign your company a Medical Waste Identification Number and will send you a letter, notifying you of this number.

Please find a copy of the Medical Waste Transporter Notification Form enclosed. Two copies of the completed notification form, for each Covered State whose wastes you transport, must be sent to: Chief, Waste Characterization Section, Environmental Protection Agency (OS-332), 401 M Street, S.W., Washington, DC 20460.

In addition, we discovered several discrepancies in the submitted transporter report. Please clarify the following:

- The Covered State for which you are submitting this report is not identified.
- The EPA Medical Waste Identification Number provided in Box 3 is incorrect. (See notification instructions above).
- Section II has not been completed.
- Section III has not been completed.

For your reference, we are enclosing a copy of the transporter report that you originally submitted and a copy of the instructions highlighting the applicable requirements in completing the aforementioned sections. Please correct and resubmit the report as soon as possible.

If you have any questions regarding the above, or require additional assistance in completing the notification form or transporter report, please contact the EPA Medical Waste Help-Line at (703) 827-8120.

Sincerely,

Michaelle Wilson
Chief, Special Projects
Waste Characterization Section
